SUMMARY

Senior full-stack engineer with extensive experience building scalable, production-quality applications across global platforms. Drives legacy codebase modernization, REST API design, and optimized data modeling using PostgreSQL and MySQL. Accelerates delivery through CI/CD pipelines, Docker, and AI-assisted development workflows. Thrives in Agile, cross-functional teams, bringing collaborative leadership and ownership to complex engineering challenges.

TECHNICAL SKILLS

Frontend: React | TypeScript | Svelte | Angular | Tailwind CSS | Datastar | Next.js | Three.js

Backend: PHP | Laravel | .NET | C# | Golang | Node.js | Spring Boot | WordPress | MySQL | PostgreSQL | SQLite | REST APIs | GraphQL | MongoDB

DevOps: Docker | Kubernetes | Cloudflare | AWS | Azure | IIS | GitHub Actions

Tools & AI: Claude Code | Figma | Jira | Confluence

Game Development: Godot | Unity | Unreal Engine 5 | C++ | Blender

EXPERIENCE

PAYCOM

Senior Software Engineer

Grapevine, Texas

2022-2026

- Delivered full-stack features across internal tools and customer-facing applications for payroll platform serving 6M employees globally, working within cross-functional team of seven engineers.
- Drove ground-up rewrites of 3-5 major front-end applications, migrating legacy codebases to modern React / TypeScript and redesigning their APIs and data models, reducing technical debt and improving maintainability across the platform.
- Contributed front-end engineering to company internationally, helping deliver localized product experiences across four international markets as part of company's global expansion initiative.
- Adopted OpenCode with Kimi v2.6 to accelerate development workflows, leveraging agentic AI to scaffold, refactor, and ship production features with significantly reduced cycle time.
- Collaborated with product and project management teams across the development pipeline to design and deliver features efficiently and maximize client buy-in.

WORD ON FIRE CATHOLIC MINISTRIES

Contract Software Engineer

Irving, Texas

2021-2024

- Designed and built new feature pages from the ground up for the main website using PHP in WordPress.
- Implemented various features for internal tools and community applications built in Laravel and React.
- Developed and deployed large-scale internal dashboard with Laravel Filament and Tailwind CSS, delivering several sections and establishing a design framework for the rest of the team to use.
- Met with internal teams to identify areas of improvement from which I could design and propose new features for internal and external applications and funnels.

REVATURE

Full-Stack Software Engineer

Reston, Virginia

2020-2022

- Trained for three months on modernized tech stack consisting of Spring, Angular, PostgreSQL, Dev-Ops pipeline utilizing Docker, Jenkins, Maven and Apache Tomcat.
- Consulted with several enterprise clients to build and deliver features across the full-stack using Spring Boot and Angular.
- Led teams through greenfield application development and live client presentations.

DRIVE STUDIO

Vista, California

Unreal Engine Developer

- Created photorealistic virtual sets for major global sporting events broadcast to millions.
- Authored versatile GLSL material shaders deployed across all studio environments.
- Re-designed production delivery workflows, significantly reducing asset turnaround time by 30%.

CODE NINJAS

Carlsbad, California
2019

Programming Instructor

- Taught fundamentals of computer programming via video game development in Scratch.
- Stemmed from established curriculum to help students further understand programming concepts.
- Developed more complex exercises for high performing students.

ID TECH CAMPS

San Marcos, California
2018

Game Design Instructor

- Taught game development and programming fundamentals using Unreal Engine 4.
- Managed students as they went through curriculum and guided them as they developed their projects.
- Contributed to curriculum development and designed advanced exercises for high performing students.

ADDITIONAL EXPERIENCE

FLORIDA INTERNATIONAL UNIVERSITY, Miami, Florida, **Front-End Developer / Software Engineer**, 2014-2015. Designed and built UI for internal university web applications and forms using vanilla HTML and JavaScript. Reduced latency and load times on the university platform and resolved critical bugs in legacy codebases . Utilized large university datasets with MySQL.

EDUCATION

JOHN PAUL THE GREAT CATHOLIC UNIVERSITY, San Diego, California
Bachelor of Science, Communications Media, Game Art and Design

2018

FLORIDA INTERNATIONAL UNIVERSITY, Miami, Florida
Bachelor of Science, Computer Science

2015
