CORE SKILLS

- PHP / Laravel
- .NET / C#
- MySQL
- Golang
- Node.js
- React / TypeScript
- Svelte
- Angular
- PostgreSQL
- Tailwind CSS
- Docker
- Kubernetes
- REST API Design
- Spring Boot
- WordPress
- Unreal Engine 5
- Claude Code / OpenCode
- Datarstar
- SQLite
- Figma

EDUCATION

B.S. Computer Science · 2015

Florida International University

B.S. Game Art & Design · 2018

John Paul the Great Catholic
University

STRENGTHS

- Full-Stack Architecture
- Legacy Code Refactoring
- API & Database Design
- Team Leadership
- Agile / Scrum

PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years building and scaling enterprise web applications, utilizing Claude Code to ship production-quality software with higher speed and efficiency. Proven track record leading large-scope refactors, designing modern APIs, and delivering high-impact features across diverse technology stacks. Targeting senior full-stack roles at fast-moving product companies where engineering velocity and code quality are both taken seriously.

EXPERIENCE

Senior Software Engineer

Paycom - Grapevine, TX · Mar 2022 – May 2026

- Delivered full-stack features across internal tools and customer-facing applications for a payroll platform serving over 6M employees globally, working within a cross-functional team of 7 engineers.
- Drove ground-up rewrites of 3-5 major front-end applications, migrating legacy codebases to modern React/TypeScript and redesigning their APIs and data models, reducing technical debt and improving maintainability across the platform.
- Contributed front-end engineering to Paycom International, helping deliver localized product experiences across 4 international markets as part of the company's global expansion initiative.
- Adopted OpenCode with Kimi v2.6 to accelerate development workflows, leveraging agentic AI to scaffold, refactor, and ship production features with significantly reduced cycle time.

Contract Software Engineer

Word on Fire Catholic Ministries - Irving, TX · Oct 2021 – Jul 2024 (concurrent)

- Built and shipped new feature pages for wordonfire.org using WordPress.
- Developed features for the internal web application in Laravel and React.
- Designed large-scale internal dashboard sections with Laravel Filament and Tailwind CSS.

Full-Stack Software Engineer

Revature - Remote · Nov 2020 – Feb 2022

- Built and delivered full-stack client applications using Spring Boot and Angular.
- Led teams through greenfield application development and live client presentations.

Unreal Developer

Drive Studio - Vista, CA · Apr 2019 – Oct 2020

- Created photorealistic virtual sets for major global sporting events broadcast to millions.
- Authored versatile HLSL material shaders deployed across all studio environments.
- Redesigned production delivery workflows, significantly reducing asset turnaround time by 30%.

Programming Instructor

Code Ninjas / iD Tech - Carlsbad & San Marcos, CA · Jan 2018 – Apr 2019

- Taught programming fundamentals and Unreal Engine 4 game development to students.
- Contributed to curriculum development; designed advanced exercises for high-performing students.

Front-End Developer

Florida International University - Miami, FL · Oct 2014 – Sep 2015

- Designed and built UI for internal university web applications and form systems.
- Reduced page latency and resolved critical bugs in legacy codebases.
